

Electronic potentiometer with switch control

51165010

1-10 V control unit

Main Features

- > For all power supplies with 1-10V interface for simple light control. If the 1-10 V control inputs of all electronic ballasts in extensive lighting systems are connected to one another and operated by the electronic potentiometer, the whole lighting system can be switched and dimmed centrally.

Specifications

Rated voltage	AC 230 V ~	Width	70.7 mm
Control current	max. 50 mA	Height	32 mm
Ambient temperature	+5 ... +25 °C	Connections	Screw terminals
Length	70.7 mm	single stranded	1 ... 4 mm ²
		Switching current for AC 230/240V~ ohmic	6 A
