

# KNX Gateway DMX-Web

### Product features

KNX DMX gateway Intelligent system device, in REG design, for coupling DMX512 systems to the KNX. For this purpose, the KNX gateway DMX-Web is connected to the KNX and the DMX512 bus. The gateway requires an AC / DC24 V supply voltage. Web control with diagnostic function DMX master or DMX slave Objects such as switching, dimming, value and feedback up to 1024 KNX objects up to 2000 connections supports all 512 DMX channels ETS4 database for synchronization with the commissioning software DMX-Gate4

Ambient temperature	-5 ... +45 ° C
Storage & transport temperature	-25 ... + 70 ° C
nominal voltage	DC 24 V
Protection class	III
Protection mode	IP20

Connection type	Screw terminals
-----------------	-----------------

### Konfigurationen

Product Code	Control	performancerecording
13516112	KNX	2 w
