

Product features

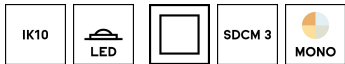

The light line system is an ideal tool for effectively accentuating buildings. Mechanically reduced to a minimum of material, the LED light line emphasises the architectural character of the building, but when switched off it blends almost invisibly into the background. The lighting insert also impresses with direct connection of the built-in LEDLUX LH3 luminaires to the mains voltage and compatibility with standard dimmers - flicker-free dimming from 10-100%. Inside the façade line, the LEDLUX LH3 is installed in the C070 profile.

Technical specifications

Protection class		IP64 (LEDLUX)	
lifespan	L80B10 60,000h @ 25 ° C	Housing material	Stainless steel V2A
Ambient temperature	-20 ... + 45 ° C	Protection class	II
Storage & transport temperature	-25 ... + 70 ° C	Protection class	IP64 (LEDLUX)
nominal voltage	AC 220 ... 240 V	Impact resistance	IK10
Nominal frequency	50 Hz	Color fidelity	SDCM 3
Weight	2.2 kg / m	Colour reproduction	typ. 90
